According to Legislative Decree N°1012, Framework Law of Public-Private Partnership, and Directive N° 004-2009-PROINVERSIÓN "Processing and Evaluation of Private Initiatives in Investment Projects", on April 29, 2010 was published the declaration of interest of the private initiative called " Ship-loading Terminal for Mineral Concentrates " located in Callao port terminal, for the information and participation of interested investors.

**Scope:**

The Project comprises the design, financing, construction, operation and conservation of a mineral concentrates ship-loading terminal.

The Project entails the following important components

- Construction of a dock to run parallel to the north breakwater, between dock N° 7 and dry dock El Ancla of the Callao Port Terminal.
- A transfer tower located on the open access site which will receive the mineral concentrates from different storage deposits.
- Installation of an airtight conveyor belt and its respective structural support in sea and land to move the mineral concentrates between the open access point and the proposed dock.
- A ship-loader
- Dredging of the maneuvering area and the berth location of the dock.

**Estimated Investment:** US\$ 120 Million.

**Deadline for bidder registration:** 90 working days after the declaration of interest.

In the attached document you may find further information on the Project.
